WORK EXPERIENCE

Technical Support (December 2025 – April 2026)
Vertex Technologies Corporation - Dagupan, Pangasinan

- Diagnosed and resolved hardware, software, and network issues while supporting system installation, configuration, maintenance, and user troubleshooting across desktop and server environments.
- Enhanced system reliability and productivity by efficiently resolving technical issues and reducing downtime through structured troubleshooting and preventive maintenance.
- Improved operational efficiency by documenting solutions, providing user guidance, and maintaining stable IT system and network performance.

Custodian (June 2024 - January 2025)
Bingo Plus - SM City Rosales

- Generate daily and monthly reports on sales, inventory, and game session performance. Monitor and maintain inventory levels, ensuring all gaming materials and supplies were adequately stocked.
- Ensured smooth operations for daily gameplay sessions by coordinating with staff and addressing operational concerns.

PHP Developer (April 2021 - March 2024)
Freelance - Remote

- Developed and maintained PHP-based web applications with MySQL database integration, including backend functionality and third-party API integration.
- Ensure reliable data management and system performance by designing efficient database structures and queries.

IT Support Technician (November 2020 - March 2021)
Self-Employed - Pangasinan

- Diagnosed and resolved hardware and software issues while performing repairs, upgrades, maintenance, and operating system and software installation for PCs, laptops, and printers.
- Improved device reliability and performance through proper system configuration, updates, and maintenance.

Jr. Technical Consultant (August 2019 - December 2019)
Via Appia Philippines Inc. - Taguig City

- Architected and integrated scalable RESTful APIs utilizing MySQL to ensure high-performance data exchange between core systems and third-party services.
- Optimized database reliability and streamlined cross-team collaboration by delivering standardized API documentation and implementing robust error-handling procedures for complex data workflows.

TECHNICAL SKILLS

Core Stack: Node.js, PHP, Python, .NET Framework
Databases: MySQL, MS SQL Server
